Commission	59	99	149	199	249	399	449	499	599	749	799

*Lumini Solutions AB reserves the right to review and update their prices for subscriptions with 3 months' prior written notice. The prices do not include taxes, VAT or any other local fees that may apply.

Starting fee

Onboarding

10 000 SEK

Assistance with installation in Dynamics 365 Business Central
 Basic setup of standard Illuminated Contracts
 2 hours training session with super users
 2 hours free support/follow up

Modules

Recurring Sales Invoicing

This is the base module of Illuminated Contracts. Define your contract definition and invoicing periodicity and the system will generate your recurring invoices automatically.

Fixed contract invoicing

This module is for invoicing fixed price services, e.g. implementations. Define the total price and divide the invoicing into predefined distributions. Let the project managers release the milestones as the project proceeds to invoice.

Commission

Use this module if you need to handle commission to your resellers. Define a commission percentage and the commission module will generate purchase orders so you can keep track and match your reseller's commission invoices.

Monthly fee & transaction definition

The monthly subscription fee is calculated based on the estimated number of yearly contract transactions. The contract transactions are calculated and regulated per calendar year counting from the subscription start date. The monthly subscription fee may be revised and regulated if the customer exceeds the agreed volume.

A contract transaction is defined as each document scheduled by the contract add-on, and later in the process created and posted with support from Illuminated Contracts. A document can be either a sales invoice, or a purchase order (the later if the commission functionality is used).

Example:

If 50 sales contracts are invoiced monthly, Illuminated Contracts will generate 600 (50*12) sales invoices documents, i.e. 600 contract transactions per year. If 50 % of these generate commission to a business partner, another 300 (25*12) contract transactions are added. This would generate a total of 900 contract transactions.
