# Illuminated Currencies

Prerequisites

1. The environment needs to have one admin user and make sure that this user has permissions to currencies, currency exchange rate services and job queue.
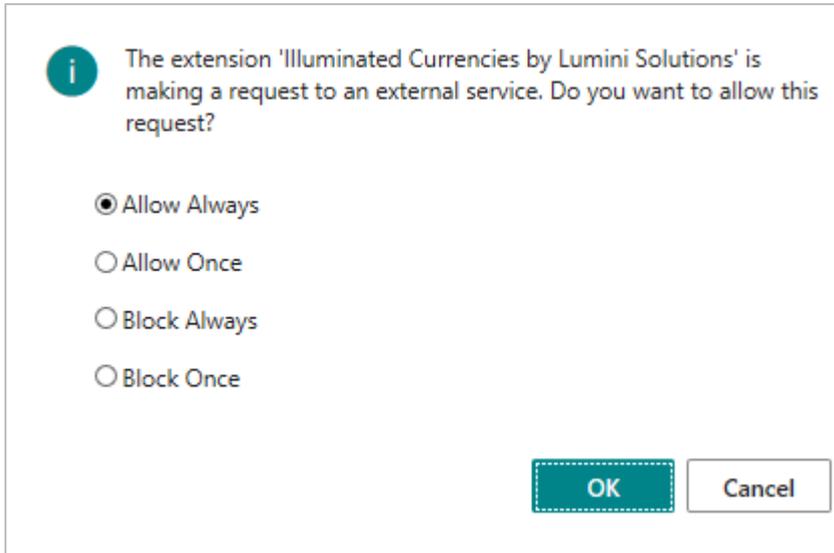

Setup

1. Make sure you are signed in as the admin user.

2. Search for **Currency Exchange Rate Services.**

3. Click on **New** to create a new exchange rate service.

4. In the menu, click on **Actions** and then on **Load Riksbanken Setup**.

5. To enable the service, click on **Enable/Disable Service**.

6. In the popup asking for external services, mark **Allow always** and click on **OK**.

7. A popup open for the created job queue (standard Business Central). Click **No**.

8. Go to **Currencies**, click on **Exchange Rate Service** and then on **Update Exchange Rates**.

9. Validate that the currencies have been updated.
