Modules

Balance

Confirm your transactions directly on your balance accounts. The core includes features for attaching documents, writing notes and print a reconciliation report for your yearend closing.

Customer/Vendor Ledger

Let the system automatically ensure that your customer and vendor ledger reconcile with your general ledger. The system can automatically save the open ledger reports as attachments.

Specification

Match debit and credit transactions against each other which allows you to define what your balance consists of.

Bank

Automatically reconcile your general ledger with bank statements.

Monthly fee & product classification

The monthly subscription fee is calculated based on number of active reconciliation companies (per tenant).

	Essential	Premium
